ABOUT

I am building my path as a Backend Developer with a focus on NodeJS, Express, MongoDB, RESTful APIs, and system integration. I completed a C# internship at FPTs, joined MANDevices Lab in web programming, and am improving TaskFlow as a practical portfolio project. I am available for a full-time internship and can start immediately.

FEATURED PROJECT

TaskFlow - Fullstack Project Management Application

A project and task management application focused on NodeJS/Express backend, MongoDB, JWT authentication, role-based access control, and APIs for users, projects, tasks, comments, activity logs, and dashboards.

- JWT registration, login, and authentication.
- Admin / Manager / Member role-based access control.
- Project, member, and task management with comments and activity logs.
- Dashboard analytics, API search, filters, and pagination.
- Source: github.com/danganhtuan-dev/taskflow-fullstack | Demo: demo.tuan.website

EXPERIENCE & ACTIVITIES

03/2023 - 09/2023

C# Intern - FPTs

- Participated in the testing and finalization stage of a software project.
- Supported bug review, root-cause analysis, and logic adjustment using C#.
- Read existing source code and worked with mentors to verify results after fixes.

2024 - 2026

Completed Military Service

- Developed discipline, responsibility, adaptability, and the ability to work under pressure.

2020

Member of MANDevices Lab - HUST

- Joined the web programming area and gained exposure to a technology product development environment.

EDUCATION

Hanoi University of Science and
Technology
Industrial Informatics | 2018 - 2022

ACHIEVEMENT

Certificate of Merit from the Chief of
the General Staff of the Vietnam
People's Army | 10/2025
